GAL Aerospace Selected by GoJet for the new Bombardier CRJ550

Interior

Montreal—

March 4,

2019 — GAL Aerospace was selected by GoJet Airlines to provide new innovative interior components for the recently launched Bombardier CRJ550 aircraft.

The interior concept of the CRJ550 aircraft will revolutionize the customer experience in the 50-seat regional aircraft marketplace. The new aircraft will feature a two-class seating configuration with more overall legroom than any 50-seat jet in the United States along with new amenities such as a convenient beverage and snack station in the First Class cabin. In addition, four closets will provide customers with ample room to store their carryon bags, making the CRJ 550 the only regional jet in the skies on which customers won't need to regularly check their bags.

“The fact that GoJet Airlines has selected us as a partner to provide the enhanced cabin interior represents an important moment for GAL Aerospace and illustrates the end user confidence in our ability to deliver an innovative interior solution” said Jonathan Cornwell – Vice President of Business Development and sales for GAL.

"The CRJ550 is an exciting development for the industry and we are proud that GoJet has chosen us as a partner for the cabin interior." said Glen Lynch, President and CEO of GAL Aerospace. "Earning our place on the launch team for this exciting new aircraft program emphasizes the talent of our employees and capability of our company to offer unique cabin solutions for the aircraft interior market."

GoJet will introduce the first CRJ550 into service in the second half of 2019 with a target to have 25 in service by year end and 50 aircraft in service by summer of 2020.

About GAL Aerospace

GAL Aerospace is rapidly growing, fully integrated global solution provider for aircraft cabin interiors. Headquartered in Montreal, QC, Canada, GAL maintains a Transport Canada Manufacturing Authority with additional qualifications as an FAA Repair Station and manufacturing facilities in Atlanta, GA and Montreal, QC.
